

Initial Build Notes

Creative Director: AnaElda Ramos

Designer: Clara Du

- Would like to include more photos of Louis Kahn on the main page, not just architecture – emphasize the biographical aspect
- Perhaps choose a different typeface for the title, bolder/larger, to feel more “monumental”
 - The typeface works well for the body text though
- Have the title take up the full landing page
- On awkward image breaks: would suggest having the geometric shapes in absolute position overlapping the image breaks
- Could try having the background images be a bit more transparent? Transparency with solid color behind?
- Projects tab – having the word “Projects” feels more appropriate than a hamburger menu, provides some good clarity
 - Text in the Projects tab hard to read, color of text could change
- Project pages – some color might be nice in/around titles or for the geometry behind text boxes
